

Coding Club

**For Pre-School aged children 4 to 8 years
(unaccompanied)**

Our Coding Club adapts a visual programming language designed to introduce coding skills in a fun way. It allows children to use simple icons to code their own interactive stories and animations. They can also learn how to reason and think logically despite their reading skill. Spaces are limited and will be offered on a first come first served basis.

Benefits include:

- Experiment with new ideas and creative thinking
- Learn about design - to start with a simple idea and turn it into a project
- Think rationally - to take complex ideas and break them down into simpler parts
- Find and fix problems independently
- To be persistent when things go wrong
- Build confidence, collaboration and communication skills
