

# Messy Play

For children aged 1.5 years to 2 years 4 months (accompanied)

**Learn through messy play!**

Children are active learners who learn through play to make sense of the world around them. Messy Play stimulates numerous senses while they explore a variety of materials, textures and smells. Classes are also available in Mandarin!

Each child benefits in his/her own way as Messy Play helps children to develop concepts that form the basis for later learning. They may practise counting, sorting and grouping with the things they make with paint. As children roll and mould play dough, they learn about decision making, problem solving, and cause & effect - what happens when they squish it or roll it in their hands.
