

Sensory Storytelling

For children aged 18 months to 2 years 4 months (accompanied)

*Sensory Room
to ignite
interest in
storytelling!*

Our relaxing Sensory Room is an ideal setting for storytelling as all the materials promote interaction in their own unique way, which in turn teaches skills such as cause and effect, colour, shape and texture recognition.

The second part of the club will take place in the classroom where we encourage children to expand upon their memory of the story they've just heard. Using a variety of art materials, they are encouraged to interpret the story, as messily as they please - whether it be drawing one of the main characters, modelling a creature that appeared, or painting new ideas - the choice is theirs!
